

## MID CONGRESS EXCURSION

### E2 GEOLOGICAL STROLLS IN PARIS LA DÉFENSE

Geological strolls are made since many years by some geologists in different cities in France. Accompanying these kinds of outings, a collection of booklets supporting by the French Geological Society is edited.

We will distribute booklets to the participants.

La Défense is a major business district located at the westernmost extremity of the 10-kilometre-long Historical Axis of Paris. The "Grande Arche" ends the alignment Place de la Concorde - Arc de Triomphe - La Défense.

During this stroll you will discover sedimentary and magmatic rocks used since 1958 for buildings and works of art.

*Geological Heritage, Heritage Stone, History of Geology*
