

MID CONGRESS EXCURSION

E6 VISIT OF THE "CENTRE DE RECHERCHE POUR LA CONSERVATION DES COLLECTIONS"

The Center for Research on Preservation (CRCC) is specialized in the study of alteration processes involved on patrimonial objects, including the vast array of natural history items housed at the MNHN, with the aim of improving conservation practices. Different types of material under study (graphic documents, photographs, leather, parchment, fossils, etc.) will be presented, as well as artificial ageing procedures.
