

PRE AND POST FIELD TRIPS

FT8 MONTCEAU-LES-MINES LAGERSTÄTTE (CARBONIFEROUS) AND AUTUNIAN STRATOTYPE (PERMIAN)

This field trip is dedicated to the Carboniferous and Permian faunas and floras of the French Massif Central. It includes (1) the visit of the exhibitions of the regional Museum of Autun where are housed exceptionally preserved organisms both from the Autunian stratotype outcrops and from the Stephanian Montceau-les-Mines nodules, and (2) a privileged access to the collections of type specimens. A visit of the historical outcrops of the Autunian stratotype is also planned with five stops in the Autun basin (including a field guide).

SCHEDULE 15-16 JULY 2018:

Day 1 July 15th: Departure from Paris (Lyon Station), at about 7:30 am.

Day 2 July 16th: Return to Paris (Lyon Station), at about 8:30 pm.
